

SOLUTION ENGINEER – ORACLE SPECIALIST

Position Summary

N8 Identity, Canada's leading identity and access management expert, is looking for a Solution Engineer specializing in Oracle technology to join its dynamic team. A member of our Professional Services department, the Solution Engineer will play a key role in the installation, integration and deployment of identity management solutions in client environments.

Position Responsibilities

- Serve as key member of Oracle Identity Management implementation team
- Install, integrate and deploy various components of Oracle's Identity suite (OAM, OIM, OID, OIF, etc) in client environments
- Participate in detailed design architecture and implement analysis that will identify requirements related to people, processes and technology
- Lead the implementation of the technical infrastructure
- Develop procedures and scripts for continuous improvement and maintenance activities related to the IAM solution
- Research technical problems and assist in identifying solutions
- Participate in identifying and implementing configuration changes
- Maintain and repair applications
- Work with clients post implementation for user testing, debugging, support, and maintenance
- Assist with management of project scope, schedule, status and documentation
- Assist with development and delivery of technical training designed to educate other staff and/or implementation partners

Qualifications

Excellent English communication skills (both written and verbal), a strong work ethic and a positive attitude are a must. In addition, the following qualifications are required:

- University degree, college diploma or minimum 3-5 years of relevant work experience
- Completion of Oracle Certified Professional (OCP) will be considered an asset
- Expertise in Oracle Identity and Access Management software (OAM, OIM, OID, etc.)
- Expertise in J2EE and Oracle middle tier architectures and implementations
- Strong PL/SQL skills. Ability to write efficient, complex queries against very large data sets
- Experience with the following programming languages: Java, BeanShell/JavaScript, JSP/Servlets, and SQL
- Experience with the following technologies: XML, SPML/SOAP, HTML, Web and Application Servers
- Experience setting up and installing software on both Windows and Unix (Linux, Sun, HP, AIX) platforms
- Experience with Databases (Oracle, Sybase, MSSQL, MySQL, etc.)
- Experience with Directories (LDAP, AD)
- Experience with enterprise systems (SAP, PeopleSoft) will be considered an asset
- Demonstrated analytical and problem solving skills
- Flexibility to work at client locations - generally located within the GTA and occasionally elsewhere in Canada/US

N8 Identity Profile

N8 Identity delivers measurable business value through identity and access orchestration. N8 Identity's Employee Lifecycle Manager™ (ELM™) platform manages identity governance through the complete lifecycle of a user within an organization: onboarding, change in responsibility, ad-hoc self-service and offboarding. This proactive process-based solution provides improved compliance, security, visibility and decision support to business managers. Augmenting its clients' existing infrastructure, ELM™ is ready-to-use and delivered as a managed service, resulting in accelerated implementation and quicker time to value. N8 Identity is a privately held company headquartered in Burlington, Ontario. For more information, please visit www.n8id.com

To Apply

While all applicants are thanked for their interest, only those chosen for interviews will be contacted.
